

# Sales and Logistics

A fully integrated end-to-end sale and logistics management solution, every stage of your operations can be streamlined with Priority ERP:

- purchase planning and requisitions,
- delivery scheduling and shipments,
- contracts, billing,
- and more.

Priority ERP helps you put your customers – first, with a fully-integrated ERP for wholesale distribution and logistics module to help you deliver:

- the right product,
- to the right customer,
- on time,
- and on budget.

You'll have a holistic view of your entire operations, from the factory floor, to the warehouse, directly to your customer's door. You can also enjoy the benefits of Priority Mobile ERP, with full functionality from any mobile device or tablet – delivery tracking, driver documentation, digital signature, and more.

Every stage of the process is seamlessly interconnected, including:

- purchase planning and requisitions,
- delivery scheduling and shipments,
- fleet management, contracts, billing,
- procurement,
- administration,
- backed by robust supply chain management.

Benefit from built-in BPM and logistics management tools to set up customized business rules and conditions.

WMS, to optimize inventory service levels and warehouse efficiency, and built-in CRM, to streamline customer order management. Improved tracking and visibility will help you anticipate customer demands and analyze profitability, so you can focus on retaining your most profitable customers.

Priority customers can also enjoy a more streamlined shipping and fulfillment process, saving valuable time, resources, and costs.
