

 Priority

## Finance and accounting | Polish Localisation

„Full control over your company's finances  
- all tools in one system!“

The financial and accounting module of the Priority ERP system is a comprehensive solution supporting financial and accounting management. It offers full support for accounting records and controlling, ensuring process automation and ongoing monitoring of business operations. Advanced functionalities in the area of accounting, taxes and financial controlling facilitate the optimization of financial management. The system is fully adapted to Polish legal regulations, which makes it an effective tool for streamlining the operations of enterprises.

# Full visibility

The Priority ERP system streamlines operations, automates processes and provides full insight into the company's finances. It includes, among others, invoicing, payments, fixed asset management, cash flow control and budgeting. Thanks to automation and access to detailed financial data, companies make better decisions, increase control over operations and optimize cost management.

- ▶ Greater control and transparency - access to real-time data supports making informed decisions, facilitates identification of problems and opportunities, which directly translates into better business results..
- ▶ Scalability - the system grows with the company, handling larger volumes of data, more complex business processes and a growing customer base.
- ▶ Unified and automated business processes - Automation increases operational efficiency, speeds up response to changes and provides more accurate, always up-to-date information - which translates into a higher level of customer service.
- ▶ Higher efficiency - automation of repetitive, time-consuming tasks allows employees to focus on strategic activities, increasing work efficiency..

## Full compliance with Polish regulations

Adapting an ERP system to the specifications of Polish law, especially in the scope of accounting, can be a challenge. The Polish localisation pack is a solution by Integris Systemy IT which is fully integrated with Priority ERP. It ensures compliance with regulations and streamlines accounting and financial tools. It includes a package regarding and extending the capabilities of Priority ERP in accordance with the requirements of Polish law.
